

Nikkayo Williams

Early Career Software Developer

Halifax, Nova Scotia | kayowilliams01@gmail.com | +19029996058 | [LinkedIn](#) | [Github](#)

Early-career software developer with hands-on experience building web applications, admin tools, and digital systems that help small organizations organize information, reduce manual work, and support real users.

TECHNICAL SKILLS

Languages: C#, JavaScript, PHP, SQL, HTML/CSS

Frameworks & Tools: ASP.NET Core, React, Node.js, Express.js, Laravel, Git, GitHub

Cloud & Infrastructure: Linux, Nginx, Docker, DigitalOcean API, Azure, AWS

Databases & Storage: SQL, Entity Framework Core, Supabase, Azure Blob Storage

PROFESSIONAL EXPERIENCE

Christ the King Parish — Web Developer / IT Intern

May 2026 - June 2026

- Updated website content, navigation, layout, and mobile readability to improve access to parish information.
- Created simple documentation for staff and volunteers using screenshots and exact workflow notes.
- Assisted non-technical staff with troubleshooting Microsoft 365, file organization, and digital communication.

Nigeria Family Helper Program | Content & Digital Communications

April 2026 - IP

- Preparing to support website content and newsletter updates for a nonprofit serving Nigerian families through healthcare, education, and family support programs.
- Planning updates to mission, services, news, donation, and hospital-related content to improve clarity for donors and community stakeholders.
- Coordinating with program leadership to align public-facing content with outreach priorities connected to Boniface & Paulina Okafor Memorial Hospital.

PROJECTS

Boniface & Paulina Okafor Memorial Hospital — Progressive Web App

May 2026 - IP

- Architecting a full-stack hospital web platform for Boniface & Paulina Okafor Memorial Hospital, combining public healthcare information, appointment requests, provider profiles, and admin content management in ASP.NET Core MVC.
- Built reusable Razor layouts, partials, and service-page patterns to reduce duplicate UI code and make future hospital content updates easier for both developers and non-technical stakeholders.
- Implemented offline-capable PWA support so patients can continue accessing key hospital information during unreliable connectivity, low-bandwidth conditions, or temporary network outages.

CloudedBasement.ca — Cloud Hosting Platform

April 2025 - IP

- Engineered a Linux VPS provisioning platform using the DigitalOcean API.
- Created GitHub webhook workflows for automated remote application deployments.
- Automated server setup for users, including Nginx configuration, SSL, runtimes, and deployment scripts.

EDUCATION

NSCC — IT Web Programming Diploma

Sept. 2024 - June 2026

- Relevant coursework: Web Application Development, Intro to Programming, Wordpress plugins, Windows Administration, Project Management
